

A MESSAGE FROM THE BOARD

Libraries in general have taken on a new role. They still and always will carry books and periodicals of all kinds.

Technology has found its way to most aspects of our lives including our libraries. The library has become a place of learning, exploration, research, play, solitude, gathering - and the hub of a community.

We, your library board, have learned ALOT in the past year. And we can attest that there is much more to a library than books! We have attended numerous meetings and workshops, visited other libraries, and connected with many new supportive people.

We cannot forget to mention our staff. Candy is our new clerk. We welcome her and thank her for wanting to participate in our projects.

Micki subs in when we need more help or someone needs a day off. What a blessing!

Renate, our leader - some people may think that the center of an organization is its board or the president. Believe me! IT IS NOT! Renate not only is the director of the library, she has the awesome job of advising and educating us about our roles as board members, and the legalities of the library organization. She keeps us up to date and on track while at the same time keeping the library a vibrant community asset.

We also thank Kathy Hartness. She is our past director and a huge resource for all of us. Kathy is also our representative and liaison with PLS, the Pioneer Library System.

We hope that the library is serving you well and that you look forward to the future as much as we do. It will be exciting to see the transformation as we move forward.

The library has many opportunities for volunteers. We would like to expand the program committee. If you are interested please speak to a board member.

Thank you all for your continued support.
